INTRODUCTION

Why having a stable position for China in a portfolio?

- Number of Chinese companies listed in HK, Shanghai, Shenzhen and ADRs (US) is over 7000. In terms of number of listed companies, it is the world's second largest market after US.
- Combined market cap of HK, Shanghai, Shenzhen and ADRs is over USD 100 trillion. In terms of market cap, it is the world's second largest market after US.
- Monthly trading volume of HK, Shanghai, Shenzhen and ADRs is over USD 1.0 trillion. In terms of market cap, it is the world's second most liquid market after US.
- Number of large cap companies (> USD 10 billion market cap) in HK, Shanghai, Shenzhen and ADRs is more than 1400. The number of large caps is the world's second highest after US.

INTRODUCTION – Fiscal stimulus

- Three-pronged fiscal stimulus has culminated in rate cuts and lowering of reserve ratios, with yuan purchases to support currency value.
- Shorting restrictions and mobilization of government funds for stock market support.

*Source: Global Times, Xinhua, Reuters, FAM

INTRODUCTION – Decentralization of Monetary policy

- China has consistently highlighted their guidance for deleveraging local governments through supportive monetary policies and tax reforms.
- Property support strengthens the sector at both supply and demand levels, with project whitelists by local governments and relaxation of homebuyer restrictions.
- We expect local governments to gain better control of cashflows and distribute support to local economies more effectively in the years to come.

Xi Vows to Rewire China's Finances, Help Indebted Regions

- Tax reforms aimed at easing local governments' debt burden

Image: Third Plenum, PRC, July 2024

INTRODUCTION – China equity markets are evolving - institutionalizing

MSCI and FTE indexes are hugely increasing their exposure to China markets

Chinese markets development over the last few years:

- In June 2018, MSCI announced the inclusion, for the first time, of domestic Chinese A Shares into its MSCI EM Index: this decision came after years of discussions based on capital controls and clearing/settlement issues
- FTSE Russell followed with the same decision in September 2018, including Chinese A shares into its FTSE EM and FTSE All-World Indices
- The initial weight of A shares into the MSCI EM Index was 0.8% as of the end of 2018. In February 2019, MSCI announced that the weight would have been quadrupled in 3 different steps, in May, August and November 2019. Midcaps and ChiNext shares were also included, alongside large caps
- As of 30.06.2024, the overall weight of China in the MSCI EM Index was 25,1%

These decisions will not only attract hundreds of billion USD of passive investment to this market, but will also increase the weight of sophisticated institutions invested

INTRODUCTION – Market Outlook

Property Market Recovery

- Property sector is the bedrock of the Chinese economy at 29% of GDP
- Property market has already showed signs of recovery
- We expect continued monetary and fiscal support

China Reopening

- China has completely reopened
- Pent up demand evident, especially in domestic services industries

Resource Self-sufficiency

- We expect policy tailwind and continued investment in sectors that are critical for resource self-sufficiency

Advance Manufacturing and Renewable Energy

- China is entering a new wave of industrial revolution – still in the early stages of penetration

A INTRODUCTION – Where we find value opportunities

I) High free cash flow & dividend grower

II) Quality growth companies with low valuation

INTRODUCTION – I) High free cash flow & dividend grower

- We like quality companies can generate **high free cash flow** and **grow dividends**
- Companies with high free cash flow indicate **good financial health** and **the reliable ability to generate "real" profits**. And **being a dividend grower**, they also demonstrate **a commitment to creating long-term value** for shareholders
- Investors can benefit from **reliable income** and **long-term value growth**

A INTRODUCTION – II) Quality growth companies with low valuation

- We also like companies with **consistent and predicable earning prospects at attractive valuations**
- Example: **Mindray Medical** listed in Shenzhen. It reported **double-digit growth** in key financial indicators for 2022, which has been the case for the past five years
- Mindray is a leading company in in-vitro diagnostics in China, with c40% market share, growing consistently c20% pa through taking market share and Chinese increasing need for better healthcare
- Trading at one standard deviation below historically PE, which we believe is **attractive**

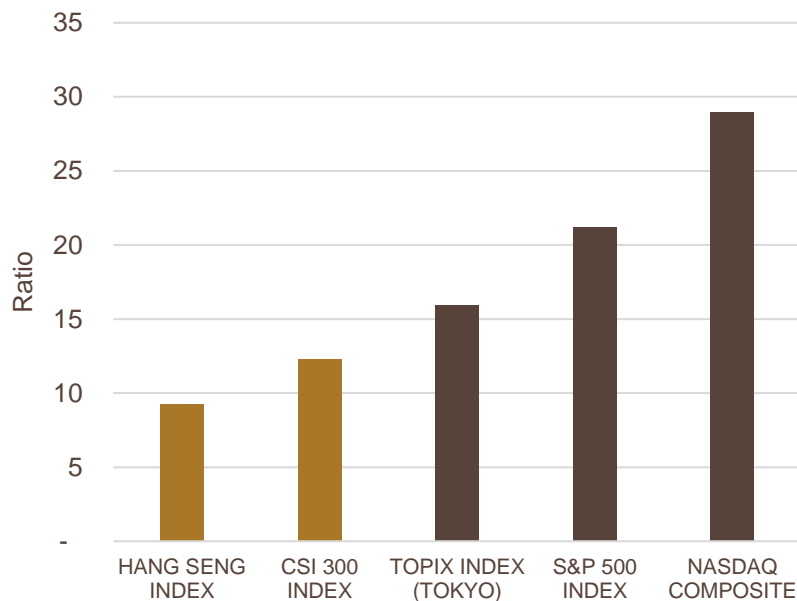

INTRODUCTION – Contrarian view

China markets are extremely cheap

- Global allocations have shown preference for foreign markets in recent years.
- HSI constituents trade at **P/B ratios of 1.5x standard deviations below historical average.**
- **Forward looking P/E** this year is expected to be the **lowest compared to global indices.**

Forward P/E 2024

Hang Seng Index 12m trailing Price to Book ratio (P/B)

INTRODUCTION

Product offered – Apuano tailor-made proposal

- Apuano Capital has launched a fund with the following characteristics:
 - Focused on the equity space, with a pure strong opportunistic bias towards Chinese exposure
 - Managed by Foundation Asset Management (FAM); an independent award winning asset management group based in Hong Kong, identified after an in-depth due diligence process in the China equity fund management companies space
 - Seeking to deliver superior risk-adjusted returns, adopting a long short equity approach and providing downside protection with an appropriate risk management process
 - Developed as the UCITS version of an existing successful hedge fund (Foundation China Opportunity Fund – FCOF) with 15 years of track record, with the exclusion of any Small Cap exposure in order to reduce volatility
 - A regulated (UCITS V) and liquid (daily) vehicle
 - Distributed to main EU & off-shore markets, via appropriate local sales forces

INTRODUCTION

Apuano Foundation China – Long Short Fund with China markets exposure

APUANO CAPITAL

Developer and Sponsor of the funds

Apuano's mission:

FOUNDATION ASSET MANAGEMENT

Key facts

- **A pure alpha generator in the Chinese market**
 - Founded in 2006, seeded by family office of UOB (Singapore's 3rd largest bank)
 - Team with a deep Chinese knowledge having an average experience of more than 20 years
 - AUM&A = 1.4 Billion USD approximately*
- **Performance and downside protection as primary goal**
 - One of the Chinese pioneer in L/S equity and value investing
 - Committed to achieve a high absolute return
 - Reduced volatility offering downside protection by a systematic and dynamic short / hedging
- **Company's flagship fund (Foundation China Opportunity Fund) delivered a unique track record**
 - One of the longest standing China hedge funds
 - Performed cumulative return and standard deviation volatility much better respect the market
- **Company committed to expand its presence in Europe**
 - Developed a similar clone of its flagship fund portfolio to UCITS standards, reducing expected volatility having a lower Small Cap exposure
 - Launched through Apuano Capital a similar clone to its flagship fund without small cap exposure having also a pure clone of the European UCITS fund developed only for the Chinese domestic market

FOUNDATION ASSET MANAGEMENT

History and future plans

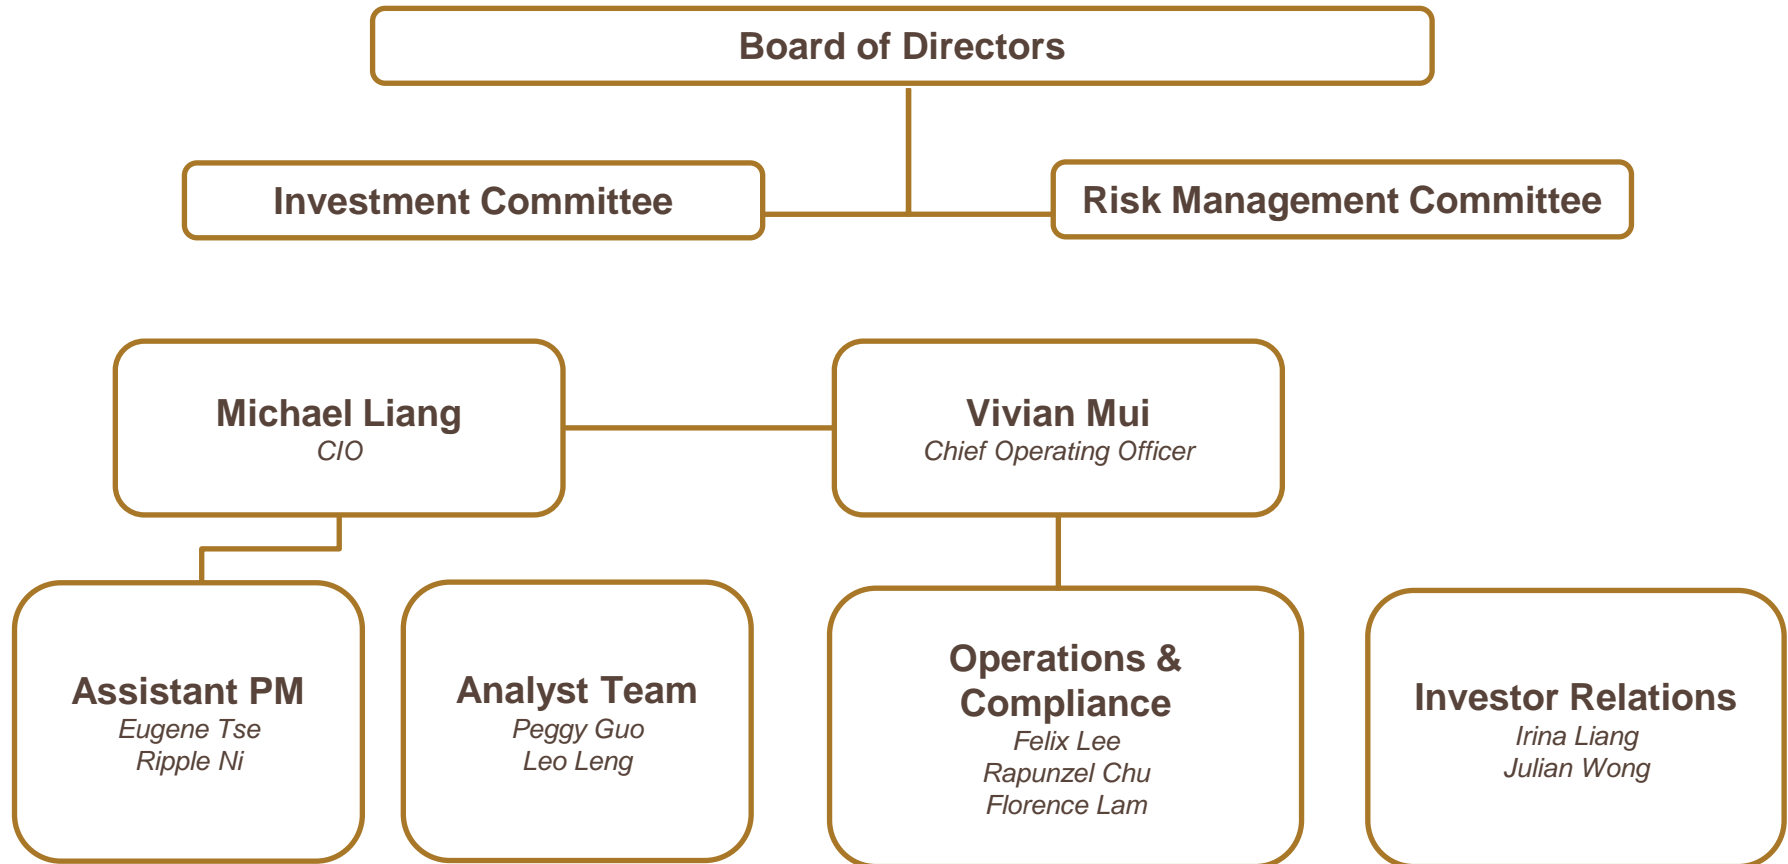

- 
- **2007:** Mr Michael Liang founded FAM with two institutional partners, initial AUM was USD 4.3 Mio
 - **2008:** China fund demonstrated great downside protection during the global financial crisis, beating market and most peers, lost 16.5% vs Hang Seng Index – 48%, Shanghai Comp – 65% and S&P 500 – 38%
 - **2016:** AUM reached about 200 Mio USD, serving a global client base from institutions, pension funds, FoFs to family offices and HNWs. FAM, won nomination and awards from AsiasHedge etc., has transformed from a start-up boutique firm into a full-fledged, mid-sized asset management firm
 - **2017:** won mainland China QD mandate from China Credit Trust Ltd (one of the top 3 companies in China with AUM RMB 357 Billion / USD 51.9 Billion)
 - **2019:** launched a retail version of FAM China fund with institutional seeders, taking advantage of mutual recognition between HK and China
 - **2020:** a UCITS V version of flagship FAM China fund (but with no exposure to small caps) is launched, mostly dedicated to European markets distribution in collaboration with Swiss boutique Apuano Capital
 - **By 2025-2027:** to become the 2nd independent fund house to be listed on HK Stock Exchange (Value Partners was the 1st HK-listed fund house in 2007)

APUANO FOUNDATION CHINA

Gross vs Net historical exposure

Apuano Foundation China Fund Gross / Net Exposure Since Inception

Source: Foundation Asset Management
Data as of end of September 2024, Apuano Foundation China Inst Class USD

APUANO FOUNDATION CHINA – Fund characteristics

Objectives and limits

Objectives Universe Constraints

- Investment objective: The Fund aims to maintain a consistent value-investing approach with a focus on liquidity and high return. The Fund may temporarily include cash and cash equivalents, up to 70% of its Net Asset Value, under exceptional market conditions for capital protection and risk management.
- Target net return/volatility: about 10% p.a. / <6% p.m. over the medium to long term
- Investment universe: primarily investing in equities issued by companies that are incorporated in China or companies which have significant operations in or derive a significant portion of revenue or profits from China.
- Investment approach: primarily by strong stock picking ability and discipline (focused on strong Free Cash Flow companies with attractive valuations) and unique portfolio construction (e.g. c20% in utility-like companies with low but stable growth between 5-10%); Short highly-leveraged companies with accounting, governance issues and growth story only supported by subsidies and M&A (negative Free Cash Flow); Supported by top-down systematic and dynamic shorting/hedging (gross exposure <200% & net exposure between 0% and 60%)

Portfolio Exposure levels Long portfolio Short portfolio

- Number of core holdings: 25-50
- Single name maximum exposure: 10%
- Maximum long exposure: up to 100%
- Expected gross exposure: 100 to 120% (max 200%)
- Use of future: for hedging purpose only
- Additional UCITS concentration and limit exposure rules apply:
e.g. total positions >5% account for <40% of fund NAV

APUANO FOUNDATION CHINA – 3 C

C	1. CAPTURE Strong upside capture whilst limiting downside
C	2. CAPITAL Value investing drives disciplined capital allocation
C	3. CONTROL 'Quantamental' model controls portfolio risks

APUANO FOUNDATION CHINA – 3 C

1. Capture – Up & Downside

The Fund's upside outperformance comes in 2 parts:

1. Strong upside capture vs low downside capture, especially on a net exposure-adjusted basis
2. Higher % of positive months, lower % of negative months

	Apuano Foundation China Fund	MSCI China
Upside Capture	83.2%	-
Beta-adjusted Upside Capture	128.0%	-
% of Positive Days	60%	54%
Downside Capture	59.7%	-
Beta-adjusted Downside Capture	91.8%	-
% of Negative Days	40%	46%

Source: FAM, Bloomberg as at 30 April 2023

*Beta-adjusted upside capture assumes a 65% historical net exposure

APUANO FOUNDATION CHINA – 3 C

2. Capital - Value Investing

A. Pioneers of adopting value investing in China

- CIO Michael Liang was one of the pioneers of value investing in HK, brought over from his experiences at Macquarie Bank, Australia

B. Value investing in the past decade

- Past decade was difficult for value investing as money was free
- Value investors pushed away as new wave of investors chased growth and duration

C. Interest rates returning to normalcy

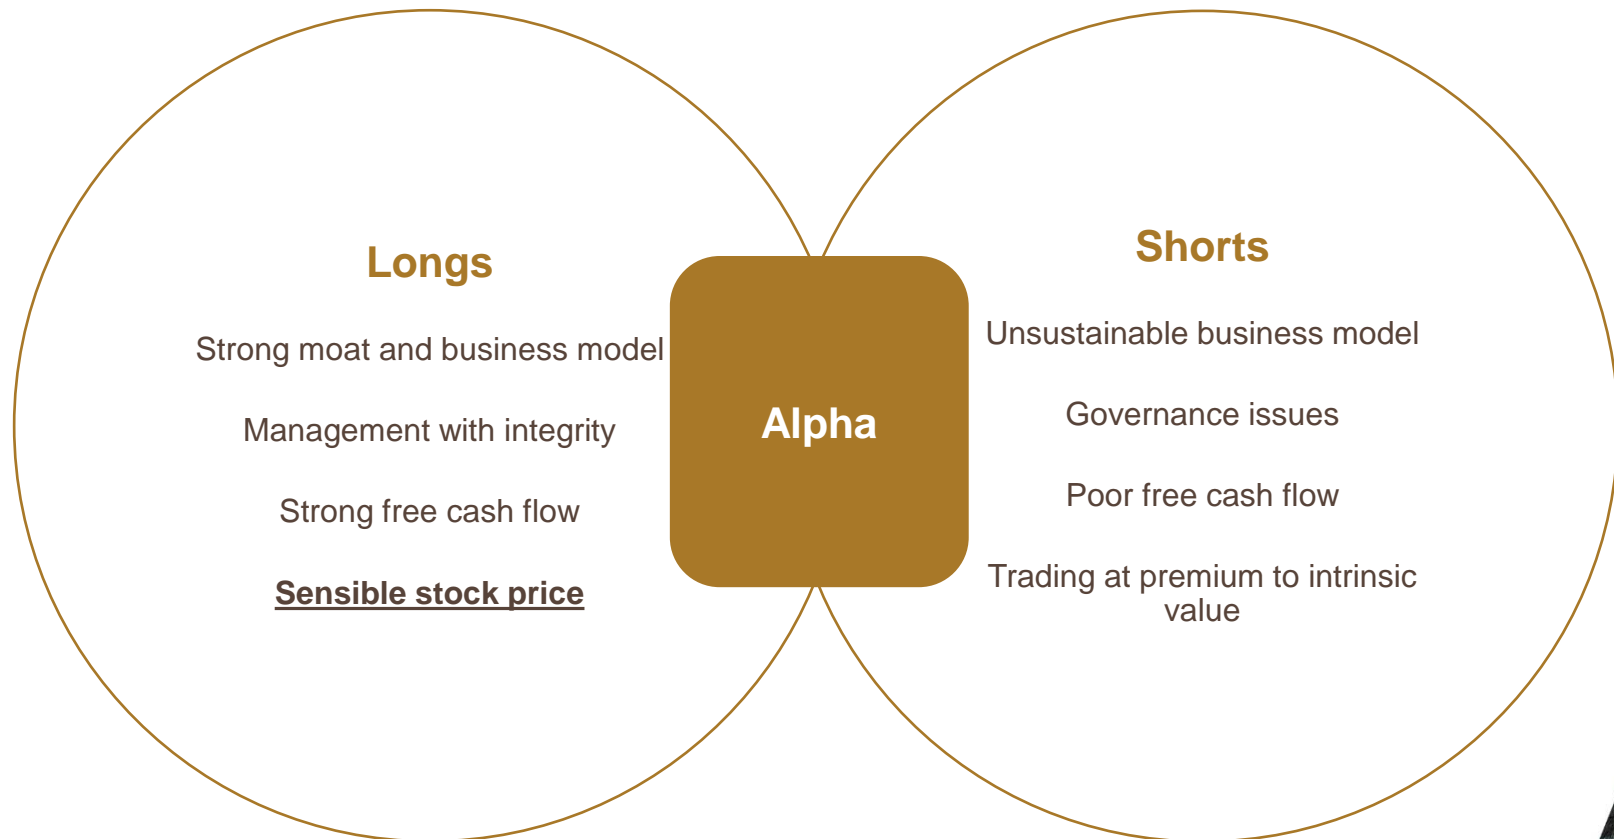

- Interest rates unlikely to go back to zero-bound
- Successful track record during these type of periods is key

APUANO FOUNDATION CHINA – 3 C

2. Capital - Bottom-Up Analysis

- **Top holdings are potential multi-baggers**, often underfollowed and out of consensus
- Private equity-like approach ensures **differentiation and discipline**

APUANO FOUNDATION CHINA – 3 C

2. Capital: Long Example

- Our industry expertise generate alpha away from crowded names

Largest global fleet of oil tankers, mainly focus on the Very Large Crude Carriers (VLCC) market

Long thesis:

- **1. Reposition** of oil supply chain due to Russian sanctions, leading to longer tonne miles
- **2. Oversupply** problem in the past, hated industry past decade
- **3. Depressed valuation**

APUANO FOUNDATION CHINA – 3 C

2. Capital: Short Example

- Contrarian approach stems from value investing philosophy, **differentiated perspective on consensus longs**

Tech platform with business in food delivery, hotel/travel bookings and community group buying

- **Initial long thesis:** Inflection in food delivery profitability, acceleration in bookings and travel segment
- **Reduction:** Draft antitrust rules in November 2020 5-Year Plan, we expected increased government regulation
- **Exit and short pivot:** Rolling stop-loss alert, also announced share issuance and negative inflection of FCF

APUANO FOUNDATION CHINA – 3 C

3. Control - 'Quantamental' Model

- CIO oversees 4 specialist analysts – dedicated coverage in consumer, cyclicals, technology and health care

Historical Long Sector Allocation

Source: FAM, Bloomberg as at end of April 2023

APUANO FOUNDATION CHINA – 3 C

3. Control - Top-Down 'Quantamental' analysis

- Intrinsic valuation approach based on asset value, profitability, or earnings growth
- Beyond fundamentals, other macro indicators that assist in the prediction of market movements
- Study of asset price performances when assumption changes
- Dynamic portfolio allocation to increase or reduce net exposures according to results from proprietary quantitative analysis

- Market valuation
- Peers valuation
- Up/downstream valuation
- Company valuation
- E.g. When asset valuation is one standard deviation below its historical average, the asset price downside risk is likely to be limited

- Macro economy data
- Foreign reserves
- Market liquidity indicators
- E.g. When PMI records a substantial increase from previous months, that implies manufacturing orders improved, indicating possible upside in market valuations

- Historical scenario
- Virtual scenario
- Mixed scenario
- Sensitivity analysis
- E.g. To test out how asset value reacts to different scenarios, such as interest rate up by 25 bps, or surge in raw material prices

- Asset allocation
- Gearing
- Hedging
- Net exposure
- E.g. Hedging to limit downside exposure when market shoots up with support of volume, as these are signs of short term optimism

APUANO FOUNDATION CHINA – Investment Process

Disciplined and rigorous process

Bottom-Up Value Investing

Top-down Analysis

Portfolio Construction

Risk Management

Intrinsic value as our foundation

- Anticipate revisions, identify mispricing
- Deep dive fundamental research: company calls, visits, conferences, channel checks
- Financial statements and valuation analysis
- Ideas forced-ranked and reviewed continuously

‘Quantamental’ investment process

- Market valuation analysis
- Macro analysis
- Scenario analysis
- Proprietary quantitative analysis

Define portfolio subject to portfolio constraints

- Create or fine-tune recommendation list of securities
- ESG at our core
- Sector diversification, position limits, liquidity etc
- Risk/return characteristics of all portfolios

Monitoring portfolio risk and compliance

- Risk reporting
- Operational risk management
- Monitor position sizes
- Stop loss
- Value-at-Risk and stress test
- Realized and implied volatility control

APUANO FOUNDATION CHINA – Risk Management

Disciplined and rigorous process

- Independent risk manager - no investment role (COO – Vivian Mui)
- It is not possible to avoid risk, we make sure we are paid properly to take it
- Long clean companies with strong balance sheets; short highly-leveraged companies with accounting and governance issues and deteriorating prospects
- Aggregate long portfolio of companies (ex finance stocks) are generally in net cash
- Hedge event risks by the means of shorting index futures or long cash
- Single position percentage control; focus on investment portfolio liquidity
- Stop loss discipline for shorts, +10% reduce ½ position, +20% fully covered
- Reduced or no allocation to small caps (<1 Billion USD market cap) compared to FCO fund

APUANO FOUNDATION CHINA – Risk Management
